

## Lights & Dimmers

### 2 Way Multi-Voltage DC Dimmer

#### Main Features Include:

- Intelligent one touch simple operation
- Simple multi-plug installation
- Can be configured for multiple switches
- Use a 2 way momentary switch of your choice
  - Momentary normally open
- Soft start bulb protection
- Inbuilt noise suppression
  - Eliminates Hi-Fi interference / humming
- Low voltage over current protection
  - Thermal overload isolation
- Low 90mA Power Consumption
- Power Source 12V & 24V DC Supply
- Switch up to increase light brightness
- Switch down to lower brightness

#### More about the Dimmer:

The Multi-Voltage Dimmer has been designed specifically for the marine Environment and works as an intelligent easy to and safe dimming solution for either standard or halogen bulb lighting circuit applications.

The Dimmer Module provides easy control from either a 12V or 24V CD power source (min 9V - max 30V) It is controlled by a 2 way momentary push button operation and incorporates over voltage protection to guard against system overload. The unit also incorporates a gentle start up feature which protects the bulb from initial surges on startup - ensuring longer bulb life.
